

Lid Support Mounting Instructions

Product #04X12, 04X13, 04X15, 04X21, 04X61, 04Y31

Assembly

1. Place bottom so that top screw hole is $1\frac{1}{16}$ " down from the top back panel. Fasten with No. 6 sheet metal screw. Secure second screw as well.
2. Open lid to 90 degrees and place lid support against the under side of lid with cover bracket flat against this surface. Secure with two screws as before. The distance from the back edge of the lid to the first screw should be approximately 3 inches, the exact distance depending on the diameter of the hinge pin "A".

Note

To find Inch Pounds, multiply half the distance from the front to back by the weight of the lid. Lids may be locked open during installation of changer by applying light pressure at point X. Press on rear of housing block.
